Security System Specifications

Design:

Because we have incorporated a modular design, we can use the best components for every situation. We use the same technology a facility uses to identify employees. This eliminates carrying extra ID cards or keys.

Controller:

We only use identification devices that are the most reliable, proven technologies available. The level of sophistication is left up to the consumer.

The following represents specifications for one type of configuration:

Choice of Proximity Card, Fingerprint or Keypad Entry

Features:

- HID Compatible Proximity reader
- Standalone or PC Managed
- Up to 4" read range
- 3000 cardholders
